

Period Time:
2022 June surveys analyze

For this Survey type “2022 June” store surveys the results are Good !
After calculating the average score of all the survey of this specific
type for year 2022 , the score is: 7!

it means that almost many of the customers are pleased and happy with this
sale for this period of time and the store staff worked well during the sale .

I would advice the managers of the Zli stores to try harder even though
That score is good you can get much higher score ! .

Well done and keep going this way

Best regards ,
ZLI Customer service Expert!
